THERMATAC®

PRESSURE SENSITIVE VINYL ENGINEERED FOR DRY TONER/LASER PRINTING

Makes customizing signage a snap.

The revolutionary vinyl for on-demand, variable data printing.

Features

ThermaTac® is a self adhesive vinyl that offers durability, strength and excellent runnability through dry toner/laser printers. Vinyl base stock withstands the high heat associated with dry toner/laser printing for smooth runnability, and its proprietary clean stripped edge protects the machine from contamination caused by adhesive oozing.

Benefits

› Available in removable and ultra removable adhesives in a frosty clear or white finish

› Cleanly removable for up to six months

› Proprietary clean stripped edges protect from adhesive oozing that cause machine contamination

› Incredibly durable, waterproof, resistant to grease, chemicals and other liquids, and suitable for indoor or outdoor environments

› Durable removable/repositionable applications and labels without leaving adhesive residue on surfaces

Applications

- Seasonal Signage
- POP Signage
- Deli Signs
- Electronics Labels
- Window Signage
- Shelf Talkers
- Bumper Stickers
- Calendars
- Appliance Labels
- In-Store Signs
- Parking Decals
- Garment Labels
- Name Tags
- Outdoor Signs

★ All products have a 4 mil flexible vinyl facestock and 0/split 90# poly liner.

ThermaTac® is suitable for most 65+ ppm toner-based digital printers.
